

Ashank Dsouza

4802775451 | ajdsouz1@asu.edu | www.linkedin.com/in/ashank-d/

Technical Skills

- **Programming Languages:** Python, JavaScript, TypeScript, Java, C#, Golang, SQL
- **Frameworks & Libraries:** React, Redux, Node.js, Express, Spring, .NET, Angular
- **Database Technologies:** MySQL, PostgreSQL, MongoDB, SQL
- **Tools & Platforms:** Docker Containers, AWS (EC2), Azure (VM), GitHub(Actions, Copilot, Git), Linux, JIRA
- **Technical Competencies:** CI/CD, Agile, Lean Development, SDLC, Data Structures & Algorithms, Mentoring

Education

Master of Science in Software Engineering, 3.85 GPA | Arizona State University | 12/2025 | Mesa, AZ

Course work: Agile Development, Human-Computer Interaction, Data structure and Algorithms, Containers

Bachelor of Science in Computer Science | REVA University | 11/2019 | Bengaluru, KA

Experience

Senior Fullstack Developer | 04/2023 - 12/2023 | Tecnotree | Bengaluru, KA

- **Achieved recognition as the top-performing team member**, receiving a cash award.
- Lead development of React UI screens, bug fixes, NodeJS API development leading to bug free screens.
- Worked with product owners in Agile Scrum environment, delivering features 15% ahead of schedule.

Full Stack Developer | 11/2021 - 03/2023 | PangeaTech | Bengaluru, KA

- **Engineered a 97% reduction in database refresh duration** (from 8 hours to 15 minutes) by developing an asynchronous Python script, saving significant client time.
- **Reduced deployment time by 85%** (from 27 to 4 minutes) by containerizing the application with Docker and automating the pipeline via GitHub Actions.
- **Improved API performance by up to 80%** by leveraging Kubernetes for horizontal pod scaling, which cut down testing and debugging time.
- **Lowered Azure cloud costs by over 30%** by re-architecting VM usage to run multiple Node.js instances per core, optimizing resource utilization.
- **Enhanced code quality and standards** by writing 50+ code reviews and authoring a code style guide.

Freelance Fullstack Developer | 04/2021 - 11/2021 | SensightLabs, Kwantx | Bengaluru, KA

- **Increased the click-through rate of customers by 30%** by conducting A/B experiments on new UI features and analyzing the results to find out which UI users preferred.
- **Developed UI components in React, APIs in Golang**, and fixed bugs in previously made APIs finally deploying the site on AWS EC2 instance using Docker.
- Automated the calculation of losses faced by business owners by processing excel files uploaded by the customer(Typescript).

Developer | 12/2019 - 04/2021 | JPMorgan Chase | Pune, MH

- Developed APIs with .NET C# using test-driven development and UI components in Angular for a **live site used by millions of customers** to book flight tickets.
- Adhered to accessibility standards maintaining all UI features to be inclusive for all customers.
- Increased test coverage of modules to over 90% to comply with coding standards.

Projects

Marketing Email Microservice

- **Improved team productivity by 75%** through introducing team to AI-agentic coding. Built server-side rendered interfaces powered by Java RESTful APIs while following Agile-Lean practices.
- **Engineered and automated a full CI/CD pipeline with GitHub Actions (on EC2)**, leading to successfully deploy the project as the only live site in the cohort.
